Data Format

train.csv / test.csv

```
user_id,item_id,timestamp
1,42,1690423400
1,88,1690427500
...
```

- Each row represents a **positive user-item interaction** (e.g., click or view)
- Timestamps are in **Unix time (seconds)** and can be used for sequential modeling

item_meta.csv

```
item_id,main_category,title, ...
42864,"Industrial &
Scientific","Stainless Steel Lab
Beaker Set, 50/100/250/500/1000ml
...", ...
61600,"Industrial &
Scientific","Digital Multimeter TRMS
6000 Counts with NCV ...", ...
...
```

- Use this file to enrich item representations, build hybrid models, or support content-aware recommendations
- Usage of this file is **optional**, but leveraging item-level semantic information may help you achieve better recommendation performance
